Prepared by:

Head of department

I. ANNOTATION

The chief purpose of this subject is to provide a comprehensive and up-to-date treatment of the subjects of brands, brand equity, and strategic brand management—the design and implementation of marketing programs and activities to build, measure, and manage brand equity. One of the subject's important goals is to provide students with concepts and techniques necessary for companies to improve the long-term profitability of their brand strategies. It incorporates current thinking and developments on these topics from both academics and industry point of view, and combine a comprehensive theoretical foundation with enough practical insights to assist future managers in their day-to-day and long-term brand decisions.

Students will gain knowledge and skills on the following topics:

• The role of brands, the concept of brand equity, and the advantages of creating strong brands;

• The three main ways to build brand equity by properly choosing brand elements, designing marketing programs and activities, and leveraging secondary associations;

• Different approaches to measuring brand equity, and how to implement a brand equity measurement system;

• Alternative branding strategies and how to design a brand architecture strategy and devise brand hierarchies and brand portfolios.

Students will also enhance their competencies in understanding:

• The role of corporate brands, family brands, individual brands, modifiers, and how to combine them into sub-brands;

• How to adjust branding strategies over time and across geographic boundaries to maximize brand equity.

II. THEMATIC CONTENT

No.	TITLE OF UNIT AND SUBTOPICS	NUMB	NUMBER OF HOURS	
		L	S	L.E.
Theme	1. INTRODUCTION TO BRANDING	3	3
