(assoc.prof. Dr.Ivan Petrov)

2.
(chief ass.prof. Dr. Milcho Bliznakov)

Head of department:
„Industrial Business and Logistics“ (assoc.prof. Dr.Jordan Ivanov)

I. ANNOTATION

"Fundamentals of business" is an introduction to the many facets of the private enterprise system and of the businesses that operate within its framework. This course provides students with an opportunity to develop a business vocabulary and advance critical and analytical thinking in solving business issues. Business is viewed first by examining national and global factors that influence its development, followed by an exploration of its internal organization. Students will analyze major issues associated with the management functions of marketing, strategy, finance, accounting, human resources and operations. This course allows students to explore opportunities and challenges of starting a new business and to develop knowledge and understanding of how the main types of businesses are organized, financed and operated.

Upon completion of the course, students should be able to apply their knowledge and critical understanding to current issues and problems in a wide range of business contexts and to demonstrate an understanding of business concepts as a foundation for studying further business subjects. Teaching methods include lectures combined with discussions, skill development by means of a problem solving approach, as well as by individual or group case studies assignments. In order to maximize learning in this course students are encouraged to participate in discussion, such as by contributing personal examples or ideas, and by asking questions.

II. THEMATIC CONTENT

No. по ред	TITLE OF UNIT AND SUBTOPICS	NUMBER OF HOURS
